

New in 2017 / 2018

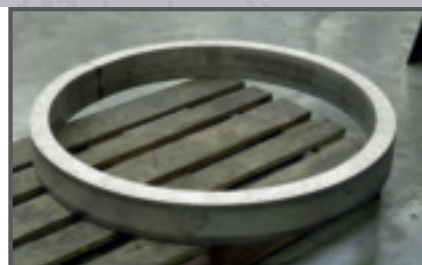

Expansion production hall

- 5300 m² workshop, stainless steel and other steel in separated areas
- 18 meters high, largest doors 9x9m
- Equipped with overhead traveling cranes, 26 hoists, up to 64 ton/overhead traveling crane
- Located near the Schelde river, transportation by ship is possible

Profile Bending Machine

- Pipes up to 4"
- L profiles up to 100/100/12

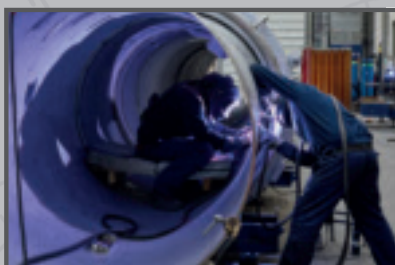

Pickling and passivation hall

- Hall 20x12 meter, height 9 m, equipped with 2 overhead traveling cranes
- Pickling and passivation bath 3500x1200x1200 mm

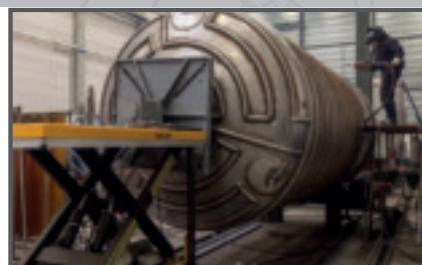

Plasma Keyhole welding installation

- Full penetration weld in stainless steel up to max 8 mm without weld preparation
- Very suitable for butt weld and fillet weld

Welding possibilities

- Submerged arc welding (SAW)
- Plasma Keyhole welding (PAW)
- TIG (up to 400A) – GTAW
- Semi automatic welding MIG/MAG – GMAW with numerous capabilities as:
 - STT
 - TPS/i
 - Power mode
 - Pulse-on-pulse
 - Rapid X
- Stick welding – SMAW
- Arc Air Gouging

Deprest is certified to weld different kinds of carbon steel, stainless steel, high alloys and aluminum.
EN1090 tot EXC3

Recent projects

Pressure vessels and tanks in carbon steel, large and small

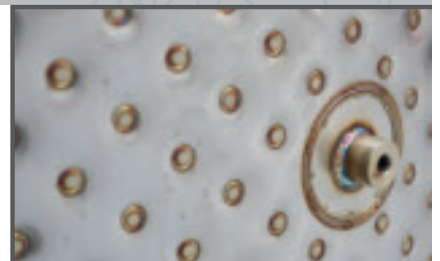

Pressure vessels and tanks in stainless steel and special alloys

Chocolate tanks, pumps and accessories

Plate Filters, equipment and skids

Certified welding and constructions EN1090 to EXC3

Subcontracting, 3d plasma cutting, rolling
